Attachments: phone dph-bls 20080820.xls

Attached is the final scrub of the land line list.
There needs to be a decision made whether to delete or retain the **highlighted** items for which we are being billed.
Please review your Division and let me know so I can inform Karen Janulewicz.

Dina and Karen-
The list I submitted after the initial review had comments for those numbers to be deleted or needed further review before deletion.
While Karen's reply addressed three of those #'s, there are eight still needing resolution.
Do you know what was the final decision (I've highlighted the numbers in question).

Kathy,

The attached file is a list of extensions assigned to employees here at our facility.
These lines are separate from the trunk lines removed from service by Verizon.
I've highlighted the ones I've deleted.

Karen

Karen-

Can you review the attached Lab Bureau list of land lines (that I had sent you after the review) and highlight those which you submitted paperwork to Verizon to have disconnected.

Then I'll have a baseline to work from and hopefully keep current.

Thanks for your help.....kathy

Subject: RE: Telephone Line Removal

The "522-" is the old prefix for our phones which was changed a while ago to "983-"

Billing telephone number 617-522-6371 (there is 617-983-6371 in the TB Lab office)

617-522-6459 (not a lab # or a 983-#)

617-522-6477 (not a lab # or a 983-#)

888-658-2649 (which points to 617-522-6371)

888-658-2850 (points to 617-522-1803).

This is the active Epi 800 number and will remain in service.

The other 888 number shows on my list as being disconnected quite a few years ago. This will remain on our disconnect list.

The two 522 numbers when dialed have a ring no answer. I had neither on my list. I think we can have these removed also.

Billing telephone number 978-858-0317 also had the following number under it:

978-585-3736 (on my list as a former 508 number which should have been disconnect a while ago).
978-858-0156
978-858-9188
Both numbers are a ring no answer when dial. Again, I think we can have these removed.
So.....if the following lines don't look familiar to either of you then I will have Verizon remove them.

617-522-6459
617-522-6477
978-858-0156
978-858-3736
978-640-9188

Hi Karen,

Passing this along to Kathy to see if she recognizes any of these lines in question.....

Kathy,

If you don't recognize these extensions, we can send it out to the lab staff again and see if they recognize any. Let me know.

Thanks...Dina

Subject: Telephone Line Removal

Hi

I submitted the necessary paperwork to Verizon for the removal of the lines that were identified as no longer being needed. After reviewing the request there was an issue with a couple of the lines having additional numbers associated with that billing telephone number as well as two 800 numbers.

Billing telephone number 617-522-6371 had the following numbers falling under it:

617-522-6459
617-522-6477
888-658-2649 (which points to 617-522-6371)
888-658-2850 (points to 617-522-1803). This is the active Epi 800 number and will remain in service.

The other 888 number shows on my list as being disconnected quite a few years ago. This will remain on our disconnect list.

The two 522 numbers when dialed have a ring no answer. I had neither on my list. I think we can have these removed also.

Billing telephone number 978-858-0317 also had the following number under it:

978-585-3736 (on my list as a former 508 number which should have been disconnect a while ago.
978-858-0156
978-858-9188

Both numbers are a ring no answer when dial. Again, I think we can have these removed.

So.....if the following lines don't look familiar to either of you then I will have Verizon remove them.

617-522-6459
617-522-6477
978-858-0156
978-858-3736
978-640-9188

I apologize if I've made this email confusing.

Karen
